Dear Moonfare hiring team,

I am applying for the CRM and lifecycle role in the Growth team.

I am a growth marketer at Blockchain.com, working across Retail, Wealth and Institutional in 26 markets. Most of my work is getting the right message to the right people, in a way each market's rules allow, and testing what works.

On CRM and audiences, I localised our CRM communications in Iterable into 24 languages with built-in APIs, which lifted email open rates by 10%. I review regulated messaging with Compliance across the UK, US and EU, and when we took our loans product into Malaysia as a new market, I set up a compliance review process with Legal before anything went out.

On investors, I worked closely with our Wealth and Institutional teams. When new EU digital asset regulation came in, a major exchange lost access to its European clients. I saw the chance to win their high net worth clients, built an outreach list of 80 publishers with AI and ran the outreach. It brought in 3 major clients. For Institutional, I built a database of 100 operators that gave our business development team 20+ active leads.

On journeys and testing, users were dropping off our perps product. I led research with active, inactive and churned users and found that many did not understand it. We made the explainer persistent and reworked the help page, and retention grew by 12%. I also ran 128 structured tests across 26 markets, and use AI in my own workflow. I automated our daily performance reporting with Claude Code, which saves the team about 10 hours a month.

I want to join Moonfare because you work across many regions, and that makes growth more challenging. Each country has its own compliance restrictions, and investors behave very differently from one market to the next. At Blockchain.com, we noticed that our users in Africa tend to take on more risk, while users in the UK are more balanced. That meant we had to create different content for each region, and I enjoyed that challenge. I like work where one size does not fit all, and I would like to bring that to Moonfare's investors.

I can share references from product marketing, compliance and legal colleagues at Blockchain.com.

Kind regards,

Jessie Chan
