Growth marketer in fintech and digital assets who builds AI systems to acquire, measure and retain users across 26 markets. I use AI to solve marketing problems, whether improving current workflows or opening new acquisition funnels. I have built agentic reporting with Claude Code and MCP connectors, an in-house AI content workflow with a skill the team now runs on its own, and API tools that localise CRM into 24 languages. I bring a data-science research background.
